The above figure, display the Public Folder and Sub Folder exist in the Exchange Server. To proceed the subsequent migration steps, click on **Next** button.

How to Apply Filters

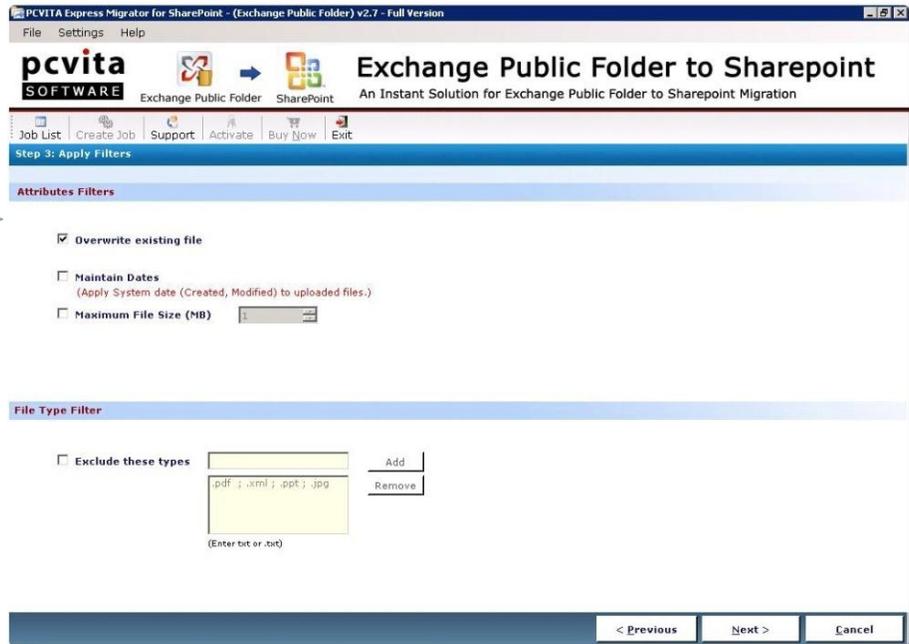

There are two ways of filtration:

1. *Attributes Filters:*

By default, the software already checked the options Overwrite existing file, Maintain Folder Hierarchy and Create a Root Folder in a SharePoint Server Document Library. Besides, check the option Maintain Dates to maintain the migration date. Though, Microsoft SharePoint has a limitation of 50MB size migrate able. Check the option Maximum File Size (MB) flexibly or your desire size.

- Can filter file by attributes,
- Filter by date specific date (Created, Modified or edit)
- Also filter by specific size (MB)

Seamlessly, single or multiple filter File by its extension.

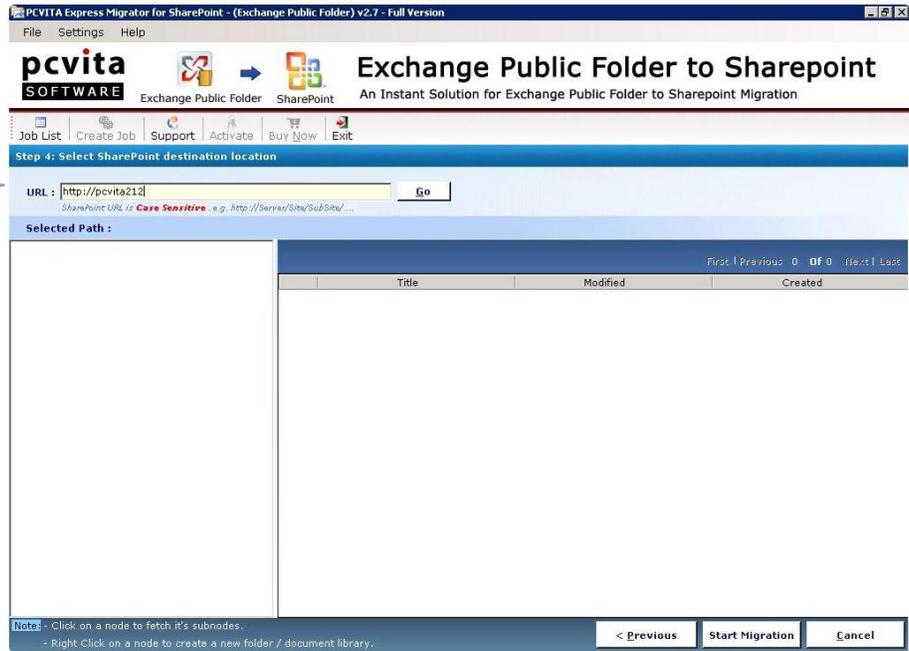

2. *File Type Filter:*

Start chuck out the unwanted file extension by adding them into the blank field. Since, by default Microsoft SharePoint server sustains certain file extension. Thus, could eventually result data replication and error.

Select SharePoint destination location

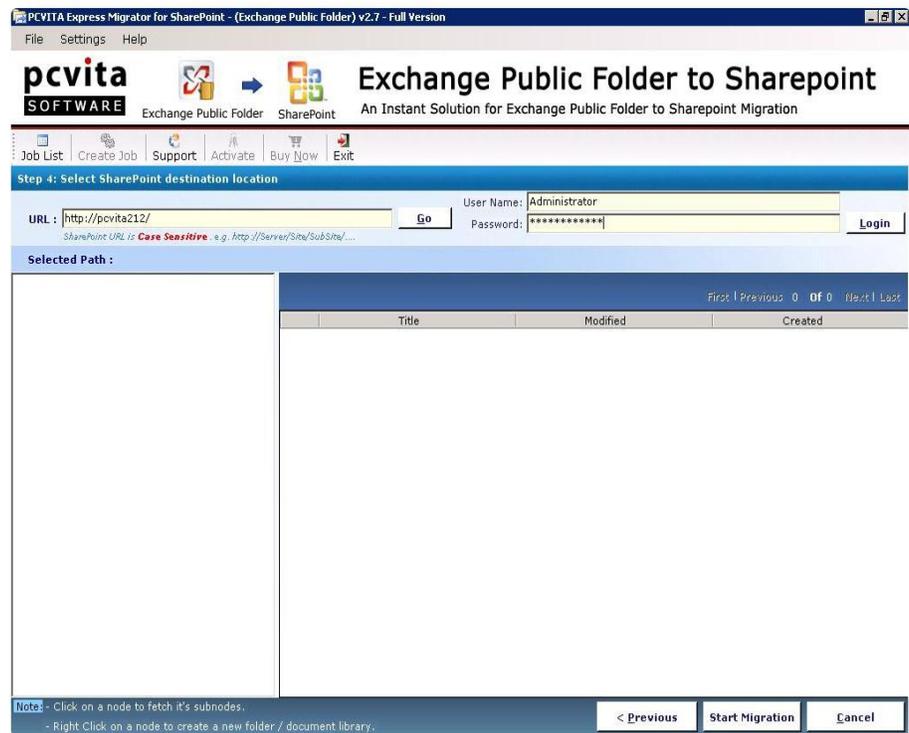

Prior before the “**Start Migration**” process, you must first provide the destination SharePoint URL.

Enter your target URL, click **Go** for server authentication

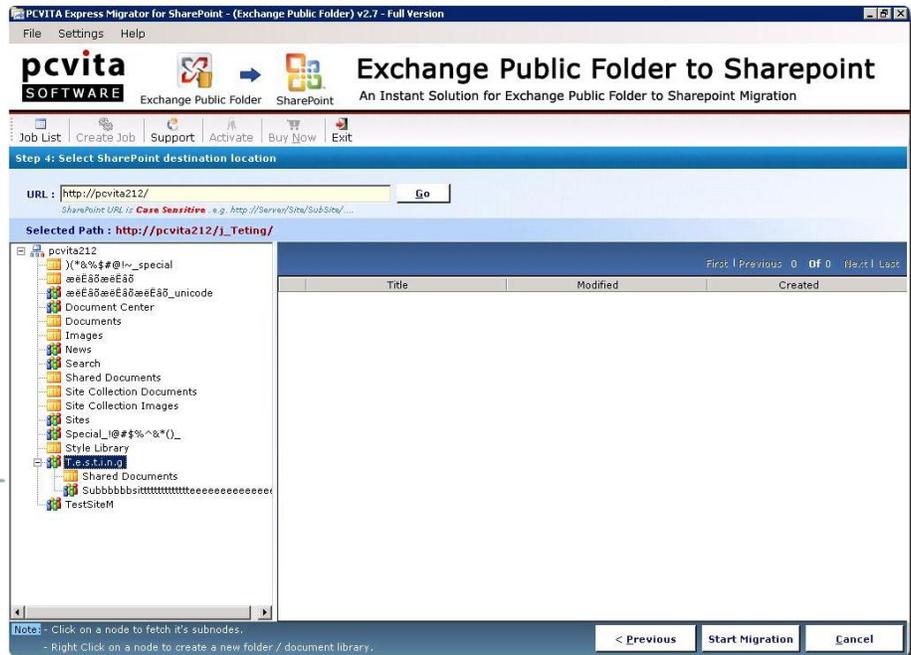

Click on **Go** button to fill your account information (i.e. User Name and Password). Finally, Click on **Login** to view the selected destination in your SharePoint server.

Starts authenticate your Exchange Server by login with your User Name and Password in the provided field.

Prior to the **Migration Process**, make sure that you have selected the right directory for the migration job.

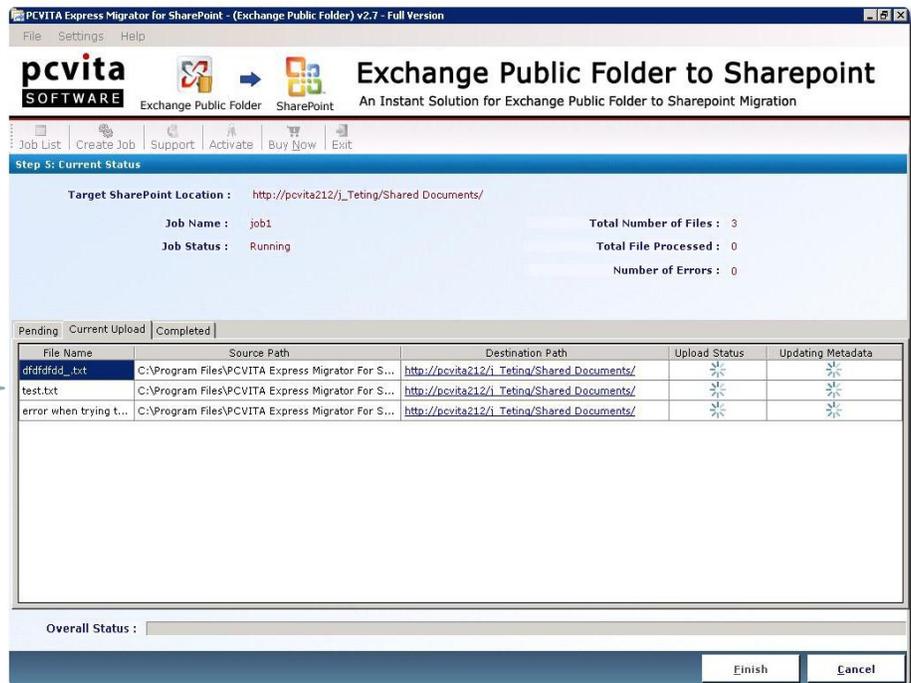

Once logged in, select your target Node where your entire Exchange Public Folder be migrated.
Click "Start Migration" button to start the migration process

Current Status

Here, the **Current Status** displays the following information functionality
Target SharePoint Location, Job Name, Job Status, Total Number of Files, Total File Processed, Number of Errors

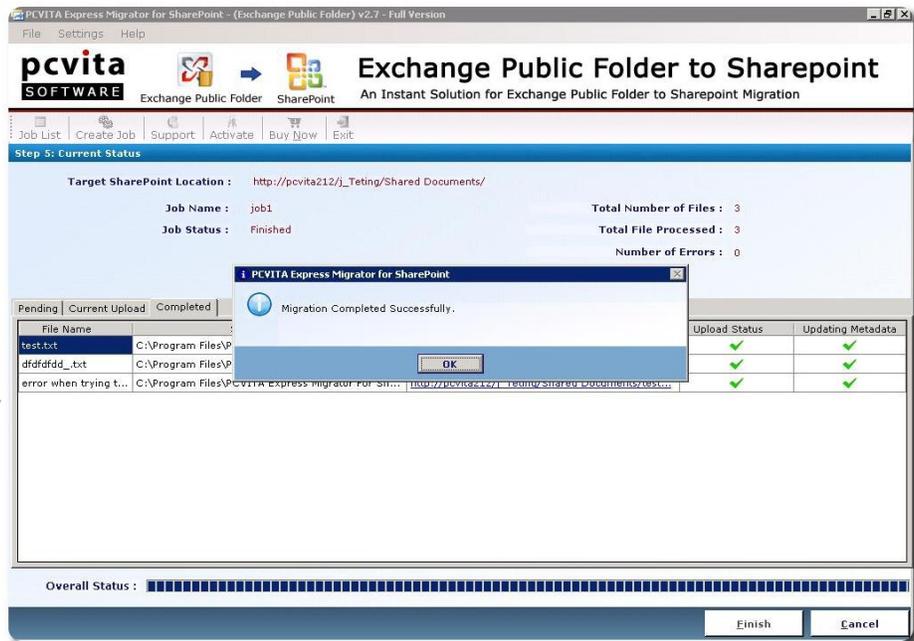

Significantly, the software enables the current operations and its information in detail

Interestingly, you can view the migration processes in the table pane. Including three table tabs i.e. Pending, Current Upload further include(File Name, Source Path, Destination Path, Upload Status and Uploading Metadata) and Completed.

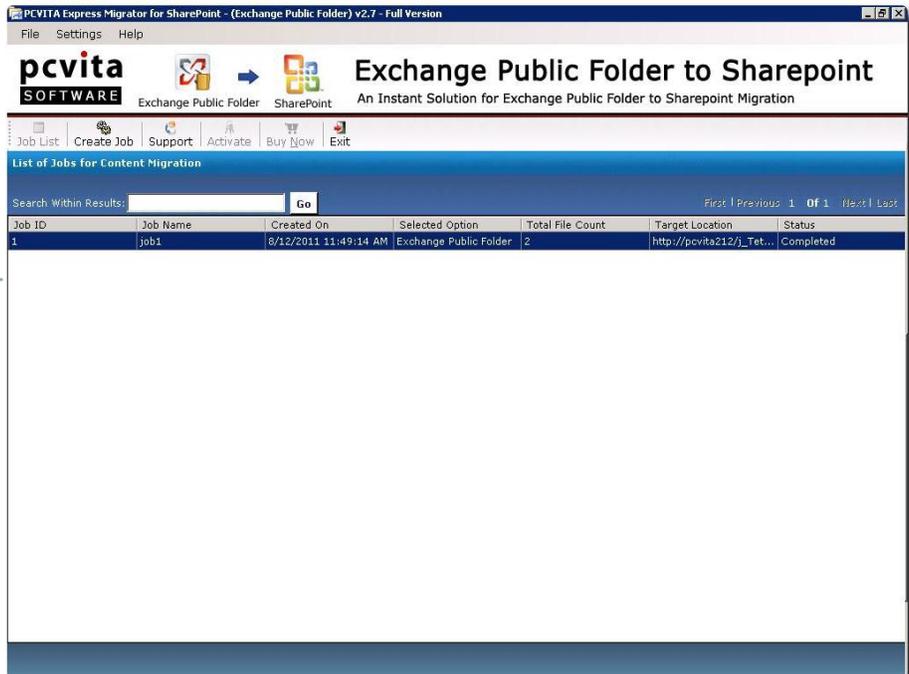

More importantly, you can start check the entire migration status, whether the jobs has been done successfully or not in the detailed pane
